

SeaRescue Tactical

SKU: SeaRes-Tac-TS

Built for extreme operations. The SeaRescue Tactical Drysuit is a premium, ergonomically designed drysuit developed for demanding missions where mobility, durability and protection are essential.

The SeaRescue Tactical Drysuit is engineered in partnership with military and police operators to meet the rigorous demands of tactical marine and surface missions. Its streamlined cut and advanced materials support exceptional freedom of movement without excess bulk, helping operators perform complex tasks efficiently under challenging conditions.

Constructed with fire-retardant, breathable layered fabrics, the suit balances longevity, comfort and heat fatigue reduction. A unique telescopic trunk allows the suit to adapt between sizes for better fit and range of motion, while reinforced patches and a seamless seat area minimise wear in critical zones. Carefully chosen seals and closures contribute to waterproof integrity and operational readiness.

The SeaRescue Tactical Drysuit is designed to be used by specialist teams who need reliable protection, freedom of movement, and durable construction in demanding marine or amphibious environments.

Key Features

- Engineered for tactical marine and surface missions with high-intensity use in mind
- Fire-retardant layered construction for durability and breathability
- Ultra-light fabric option to reduce heat fatigue
- Tailored pattern minimises excess material and enhances mobility
- Telescopic trunk allows better fit adjustment between sizes
- Reinforcement patches and seamless seat construction reduce wear points
- Expandable thigh pockets for practical storage
- Neoprene glide-skin neck and cuff seals with adjustable options
- Waterproof zipper on the back with relief zipper on the front
- Includes internal braces and gloves for complete tactical readiness
- Developed with input from military and police user groups for real-world performance
