

1000S Rear Aircrew X-Don Immersion Suit

SKU: 1000S-Aircrew-Re-Xdon

1000S X-Don Rear Aircrew is a robust, lightweight work/survival suit manufactured using advanced materials with a design that improves comfort and safety for rear aircrew during over water helicopter operations. OEM Artno: S1-1000GF250-OR

The suit is equipped with a diagonal main front entry zip and a separate neoprene neck seal. Internal braces and internal lining with Velcro fastening. The suit has an ergonomic design with necessary reinforcements for comfortable and safe work on board. The outer shell of the suit is waterproof, breathable and flame retardant. Anti-microbial lining with temperature regulating phase change material, originally developed for spacesuits by NASA. The material emits stored heat in cool environments and cools the wearer in warm environments. The suit is ETSO 2C503 approved as a crew suit with lining providing a minimum of 4 hours of thermal insulation in cold water.

Compatible with Halo Aircrew Lifejacket

Key Features

- X-zip w/separate neck seal
- Anti-microbial lining that integrates NASA-developed technology to facilitate thermal regulation - providing increased comfort and survivability in water
- Produced in Gore-Tex Farnborough (Nomex with Antistatic)
- Ergonomic design that has been tested on all major aircraft types
- Reinforcement panels on the knees/seat/elbows and with knee pad inserts
- Horizontal urinal zip
- Super elastic and comfortable neoprene seals
- Air release valves on both sleeve/shoulders which ensure that the suit is ventilated to enhance in water mobility

Specifications Drysuit Industry and Applications Certifications Product Info
