

Ascotherm Mk I

SKU: 85601

Essential thermal protection — whenever it's needed. The Hansen Ascotherm MK I is a reliable, emergency thermal wrap solution designed to help retain body heat and support survival in cold, wet or shock-induced conditions.

The Hansen Ascotherm MK I provides thermal protection for survivors in liferafts and rescue boats, helping to shield them from rain, wind, and cold weather. Commonly used by first responders, rescue teams, medical personnel and outdoor operators to combat hypothermia risks. Each wrap is constructed with a metallised, heat-reflective inner layer that helps retain body heat by reflecting radiant heat back toward the wearer. The lightweight, compact design makes it ideal for inclusion in emergency kits, ambulances, liferafts and survival packs.

These thermal wraps can be used in a wide range of scenarios, from treating shock or mild hypothermia on land to providing supplemental warmth in cold, wet maritime environments. Their simple, intuitive design allows responders to apply them quickly in time-critical situations.

Key Features

- Metallised inner surface reflects radiant heat back to the body for effective insulation
- Lightweight and compact ideal for inclusion in first aid, rescue and survival kits
- Helps protect against hypothermia in cold, wet or shock scenarios
- Simple, intuitive design for rapid application in emergencies
- Suitable for medical responders, rescue teams and outdoor operations
- Cost-effective bulk value for emergency preparedness and standby use
- Disposable single-use wraps for quick deployment

Industry and ApplicationsCertificationsProduct Info

Industry	Shipping
Other certifications	IMO/SOLAS 74, Thermal protective aid
