

SeaWind Firefighter

SKU: Firefighter-Suit

Fire gear you can trust when every second counts. The SeaWind Firefighter Suit is a professional firefighting work suit engineered to provide reliable protection, comfort and functionality for emergency responders in demanding offshore and marine conditions.

The SeaWind Firefighter Suit is designed for firefighters and emergency personnel operating in marine and offshore environments, where heat, flame, water and physical demands come together. Built with performance and safety in mind, the suit provides a protective barrier that balances flame resistance, durability and wearer comfort throughout the rigors of emergency response.

Constructed from flameretardant and durable materials, the suit is developed to resist heat and fire exposure while maintaining strength against abrasion and environmental wear. Its ergonomic design supports natural movement and sustained activity, helping responders perform complex tasks with agility and confidence.

Thoughtful functional elements such as adjustable closures, protective reinforcements and practical storage options support ease of use during rapid response situations. Enhanced visibility features aid teamwork and safety in lowlight and highsmoke conditions. The SeaWind Firefighter Suit is tailored for demanding operational use where protective performance and practical functionality are essential.

Key Features

- Professional firefighting work suit for marine and offshore environments
- Flameretardant materials engineered for heat and fire resistance
- Durable construction built to withstand abrasion and environmental wear
- Ergonomic design for freedom of movement and sustained activity
- Adjustable closures for secure fit and comfort
