

SeaArctic

SKU: SeaArctic

Engineered to protect when survival is on the line. The SeaArctic Emergency Immersion Suit delivers robust thermal protection, selfrighting capability, and reliable performance for offshore evacuation and emergency situations in cold water environments.

The SeaArctic Emergency Immersion Suit is an advanced emergency survival suit developed for use aboard offshore vessels, mobile offshore drilling units, and other offshore installations. It builds on established immersion suit designs with critical enhancements that improve survivability in cold and rough seas.

A defining feature of SeaArctic is its integrated selfrighting system, which automatically turns the wearer into a faceup position in the water, even if unconscious, helping to protect the airway and improve chances of rescue. The suit also includes a manual inflatable bladder in the hood to enhance watertight sealing around the face and increase freeboard and stability in the water.

Delivered with a bag, color indicated for sizing.

Key Features

- Emergency immersion suit designed for offshore vessels and installations
- Integrated automatic selfrighting system for correct faceup flotation position
- Manual inflatable bladder in hood to improve watertightness and freeboard
- Certified for 6 hours of thermal protection in cold water
- Built from flameretardant and UVresistant neoprene for strength and insulation
- To be used without a separate lifejacket due to integrated buoyancy
- Watertight neoprene cuffs and detachable gloves
- Reflective markings for enhanced visibility in lowlight conditions
- Emergency light and whistle for rescue support
- Buddy line with floating hook and lifting becket with stainless steel Dring
- Spray hood for additional protection against spray and wind
- Rubbersoled neoprene socks for grip on slippery surfaces
- Vacuum packing option for extended service interval

Suit Size	Weight	Dimensions packed in carrier bag	Colour of bag	Dimensions packed in vacuum	Service-interval packed in vacuum
