

SeaEco

SKU: SeaEco

The SeaEco abandonment immersion suit offers reliable thermal protection for survival in cold-water emergencies. Designed for simplicity and compliance, it's the cost-effective choice for vessels operating in harsh marine environments.

The SeaEco is a SOLAS-approved emergency immersion suit engineered for rapid deployment during abandon-ship scenarios. Constructed from durable, waterproof neoprene, it provides critical insulation to reduce the risk of hypothermia in cold-water immersion. Its bright colour and reflective patches enhance visibility for rescue teams, while integrated safety features, including a hood and gloves, maximise survival chances.

The SeaEco suit is designed for quick donning, even in stressful conditions, and fits a wide range of body sizes thanks to its adjustable components. It requires no additional thermal liner, making it a practical and economical solution for commercial shipping, offshore installations, and passenger vessels. Compact for storage and easy to maintain, SeaEco is trusted worldwide as a dependable emergency safety measure. This solution must be worn with an approved lifejacket.

Key Features

- SOLAS certified: Meets international safety standards
- Quick donning: Designed for rapid deployment in emergencies
- Thermal protection: Maintains body heat during immersion
- Waterproof neoprene: Durable and insulating material
- Integrated safety: Hood and gloves included for full coverage
- High visibility: Bright colour and reflective patches for rescue
- Adjustable fit: Suitable for a wide range of body sizes
- Compact storage: Easy to stow and maintain
- Proven reliability: Trusted for commercial and offshore use
- Medium (147-170cm) / Std (150-200cm) / Extra Large (180-210cm)
