

SeaNordic

SKU: SeaNordic

Prepared for the harshest seas. The SeaNordic Emergency Immersion Suit is built to deliver dependable thermal protection and survival performance for offshore and maritime personnel operating in cold water environments.

The SeaNordic Emergency Immersion Suit is a professional-grade survival suit designed for use aboard vessels, offshore facilities and in other marine operations where rapid evacuation and prolonged exposure to cold water are possible. Engineered to stand up to demanding environments, the suit provides reliable insulation, buoyancy and protection when it matters most.

Constructed from durable, flame-retardant and weather-resistant materials, the SeaNordic suit supports prolonged wear and reliable performance in cold and rough sea conditions. The suit's design emphasizes thermal protection, watertight integrity and comfort to improve survival chances in emergency immersion scenarios.

Functional features such as secure cuffs, protective seals and reinforced areas help resist water ingress while supporting mobility during emergency egress. Practical survival elements contribute to visibility and rescue readiness. The suit is designed to work without the need for a lifejacket.

Key Features

- Professional emergency immersion suit for offshore and maritime use
- Durable, flame-retardant and weather-resistant construction
- Designed to provide thermal insulation in cold water environments
- Secure cuffs and protective seals to resist water ingress
- Reinforced areas for durability in demanding conditions
- Buoyancy characteristics that support immersion survival
- Enhanced visibility elements for improved detection
- Multiple sizes available for optimal fit
