

Crewline Pro Safety Line

SKU: Crewline Pro Safety Line

The Crewline Pro safety line range is designed to meet the needs of those who may wish to tether to a yacht in unstable conditions, where there may be risk of falling overboard. Constructed using self-locking safety hooks, with a wide opening, allows the user to easily attach the Crewline Pro to the attachment point on a lifejacket or safety harness and a suitable anchor point on the yacht as required. Approved for lifejackets with ISO 12401-approved deck safety harness.

The Crewline Pro safety line range is designed to prevent the user from falling overboard from the vessel in rough conditions. Constructed using self-locking safety hooks, with a wide opening, allows the user to easily attach the Crewline Pro to the attachment point on a lifejacket or safety harness and a suitable anchor point on the vessel /yacht as required.

Constructed from a durable, hydrophobic webbing helps to keep the safety line as light as possible, even in the harshest environments, as it reduces the amount of water absorbed compared with conventional safety lines. This combined with its advanced hook makes the Crewline Pro a first choice for those exposed for the ultimate challenging environments where nothing but the very best in performance technology will do.

Each Crewline Pro includes an overload indicator which is activated when the line is placed under an excessive load of 400 kg. There is additionally a warning label which, when exposed, means the safety line should not be used.

Key features

- Lightweight self-locking hook
- Reflective detailing
- Compact
- Constructed from a durable, hydrophobic webbing
- Electric neon colourway
- Easy to use
- Overload indicator (maximum weight 400 kg)

Dimensions

- Double Hook non-elasticated: Max length 180cm
- Double Hook elasticated: Max length (under a 10kg load) 180cm
- Triple Hook elasticated: Max length (under a 10kg load) 194cm, 180cm and 94cm
**dimensions are not accurate and may have slight variations*

Certifications

ISO

ISO 12401 (SH/Safety Line)
