

38g CO² Cylinder – compact

SKU: 13266

38g CO² cylinder to replace used cylinders in inflatable lifejackets with a bladder providing up to 190N buoyancy. This cylinder is compact and is suitable for, among others, Crewsaver Crewfit 150N XD.

If you are replacing the CO cylinder on your inflatable vest, please read the user manual carefully so that you replace with the correct cylinder.

This 38 gram cylinder is suitable for bladders in inflatable lifejackets with buoyancy up to 190 Newtons. This cylinder is compact and is specially adapted to Crewsavers inflatable lifejackets that require a 38 gram cylinder, such as the Crewfit 150N XD. This cylinder is also compatible with Crewsavers cylinder security system Exolok.

Please note that replacing the cylinder may also require a new capsule, safety clip and cylinder security system.
