

Aqualung Small Squeeze – Dive Knife Blunt

SKU: 88176

The Small Squeeze dive knife is the perfect little knife. It's small, compact and compatible with most of our BCs, so you won't even notice it's there, but you'll be happy you have it when you need it. A patented locking mechanism keeps the knife secured in its sheath waiting to be used at the squeeze of the handle.

Key features

- Secure: Our Squeeze knives are easy to remove intentionally by squeezing the ridged bolster, but nearly impossible to accidentally un-sheath.
- Perfect when space for attachment is limited: 3½" blade; 7" long overall (8.9cm/17.8cm).
- High Grade Metal Alloy: Blade made of 304 stainless steel
- Mounting Options: Sheath may be secured to your BCD (via grommets), a belt (via a 2"/5.1cm locking clip on the sheath), or rubber leg straps (sold separately) via strap slots
- Attaches Easily: Knife handle has a hole for lanyard attachment.
- Easy Drainage: Drain holes in sheath make re-sheathing easy.
