

Swift Water Rescue

SKU: 83247-50BASTD

Designed for rescue teams and rapid response. The Swift Water Rescue Buoyancy Aid is a high-performance emergency flotation vest built to support water rescue personnel in fast-moving, challenging conditions.

The Swift Water Rescue Buoyancy Aid is a purpose-built 80N rescue buoyancy device developed for professional rescue teams and emergency responders. Engineered to support activities such as swift water rescue, boat-based recovery and other marine emergencies, it combines buoyancy support with practical features that help rescuers work safely and efficiently.

This buoyancy aid is designed to be user-friendly and adaptable, with a custom one-size-fits-most fit that ensures it can be donned rapidly in urgent situations. The vest incorporates multiple pockets and attachment points to carry essential rescue equipment and communications gear, enabling rescuers to keep their tools accessible during operations. Additional design elements focus on durability and visibility, helping teams remain visible and mobile in diverse water environments. The Swift Water Rescue Buoyancy Aid supports professionals who demand reliable flotation performance combined with functional utility in emergency response scenarios.

Key Features

- 80N buoyancy aid designed for rescue and emergency response teams
- One-size-fits-most configuration for rapid donning in urgent situations
- Side flaps for impact protection that can reduce heat buildup
- Reflective print for enhanced visibility in low-light and water conditions
- Specially positioned grab handles to aid fast retrieval of the wearer
- Dedicated radio pocket with side zip entry for easy access to communications gear
- Quick-release buckle with toggle for secure closure
- Anti-snap buckle cover to prevent accidental catching
- Velcro tab for cowtail attachment and integrated tool tethering
- Multiple pockets and attachment points to store and organise rescue tools and equipment
