

Skylotec IGNITE PROTON Wind

SKU: Skylotec-proton-wind

Completely equipped body harness for fall arresting. With synthetic sliding plate, this harness was specially designed with the wind energy sector in mind. The thermo-shaped hip padding evenly distributes weight and is protected from wear and tear on the outside with a plate.

Key features

- Back cross with textile cover
- Construction allows the fall arrest attachment point to be perfectly positioned for each user
- Practical belt strap coilers eliminate bulky excess length
- Shoulder and leg padding can be laundered or replaced
- Pre-formed gear loops and tool eyelets for different kinds of use ensuring versatility
- Max load 140kg
- Number of sizes available
- Standard: EN358:1999, EN361:2002
