

Crewsaver Universal Light (CUL) w/ext sensor & bracket

SKU: 83217

Stay visible in an emergency with the Crewsaver Universal Light, featuring automatic water activation through an external sensor, a powerful flashing LED and manual on/off control.

Approved to SOLAS, MED and USCG requirements, this flashing lifejacket light meets relevant safety standards and helps keep you visible in emergency situations at sea. The Crewsaver Universal Light is suitable for all types of lifejackets using the supplied surface-mount bracket.

The light activates automatically when the switch on the external sensor is fully immersed in water. It switches off when removed from the water and can also be turned on or off manually using the control button.

Key features
