

Crewsaver Universal Light INT.

SKU: 83238-1

Stay visible in an emergency with the Crewsaver Universal Light, featuring automatic water activation, a powerful flashing LED and an integrated sensor.

Approved to SOLAS, MED and USCG requirements, this flashing safety light meets relevant safety standards and helps keep you visible in emergency situations at sea. The Crewsaver Universal Light is suitable for all types of suits using the supplied surface-mount bracket.

The integrated sensor activates the light automatically when it is fully immersed in water. The light remains activated until it is manually switched off.
